

ANAF NAUFALIAN

Bogor, Indonesia · anafnaufalian@gmail.com · +62 851-5698-8228 · kafri8889.github.io

A passionate Android developer with a strong interest in Android and Kotlin. Currently studying at Gunadarma University, I started my Android development journey in 2018 and have worked on 10+ personal projects. I enjoy creating innovative and useful applications while continuously improving my skills. Adaptable to both independent and team-based work.

WORK EXPERIENCE

Assistant of Praktikum Mata Kuliah Unggulan DGX

Universitas Gunadarma

March 2025 – August 2025

- Assisting students in using DGX machines during practical sessions.
 - Address students' questions related to programming codes and troubleshooting errors.
 - Participate in Forum Group Discussion activities.
-

PROJECT

Bentala - iCEBIV 2025

Android Development, and UI/UX Designer

July 2025 – September 2025

- Designed and developed a hydration reminder app with water intake tracking, progress statistics, and gamified missions
- Implemented notification and analytics features to support daily hydration goals.
- Built a clean, easy-to-navigate interface for better user experience.

Intellibra - International Innovation & Design Expo (IIDEX 2025)

Android Development

March 2025 - April 2025

- Developed an Android app for Intelibra, a smart bra system supporting breastfeeding mothers through real-time monitoring.
- Integrated IoT sensor data (pressure, temperature, color) with Firebase for live tracking and synchronization.
- Implemented the provided UI design and linked the app with the wearable device for data transfer.

Planet Pulse Academy – Google Hackfest 2024

Android Development

December 2023 – January 2024

- Developed PlanetPulse Academy, an educational app for children aged 6–17 focused on environmental awareness.
- Implemented account login, profile management, and interactive learning features with quizzes and progress tracking.
- Collaborated in brainstorming and improving the app idea.

CERTIFICATION

Belajar Pengembangan Aplikasi Android Intermediate

Dicoding, 2024

- Covered advanced Android topics: custom UI, animations, localization, accessibility, services, media (MediaPlayer & ExoPlayer), geolocation, and Firebase integration.
- **Final Project:** Created a story-sharing app with camera features and Google Maps API.

Belajar Pengembangan Aplikasi Flutter Intermediate

Dicoding, 2025

- Covered advanced navigation (Navigation 2.0), media integration (camera, gallery, audio/video playback), localization, accessibility, and animation techniques. Also explored maps, location, and pagination.
- **Final Project:** Developed a story app with animated UI, map display, infinite scroll (paging), and multi-language support.

EDUCATION

Bachelor of Computer Science

Gunadarma University

2023 - Present

Science Major

MAN 1 Bogor

2020 - 2023

AWARDS

- 2nd place in the International Innovation & Design Expo (IIDEX 2025)
- 1st Place – Gold Medal, iCEBIV 2025 (Business Model Canvas Category)

SKILLS

- Kotlin, Java — Jetpack Compose, MVVM, OOP, Coroutines, Retrofit, Hilt, Room, WorkManager
